Vigilance Protects the Nation.

WHO WE ARE

Sahana Defence

Sahana Defence is a globally aligned Aerospace and Defence deeptech company delivering sovereign capabilities for national security and critical infrastructure protection.

Supported by in-house R&D, manufacturing & fabrication and engineering capabilities, we design and deploy differentiated, customized solutions across Electronic Warfare, Information Warfare and Defence DeepTech.

Our integrated technology approach, execution capability and focus on sovereign innovation position us as a trusted partner to defence forces, government agencies and critical infrastructure authorities.

QUALITY STANDARDS WE FOLLOW

Vision

To be a globally trusted Aerospace and Defence company, shaping the future of modern warfare through innovation, indigenous engineering and sustained high-growth excellence.

Mission

To build advanced, mission-ready Aerospace and Defence capabilities across Electronic Warfare, Information Warfare and Defence DeepTech, delivering sovereign solutions that safeguard national security, empower defence forces and smarter critical infrastructure.

COMPANY SNAPSHOT

Sahana Defence at a Glance

50+

Govt and PSU Clients

Trusted by defence, aerospace, government and strategic organizations.

13+

Years of Expertise

Delivering engineering excellence across defence and aerospace domains.

In-House R&D

Focused on mission-ready innovation and indigenous defence solutions.

5 STRATEGIC CAPABILITY PILLARS

Electronic Warfare

Information Warfare

**Quantum Technology
Solutions**

Defence DeepTech

**Aerospace & Defence
Manufacturing**

Together these capabilities create an end-to-end defence ecosystem supporting national security and critical infrastructure protection.

● ——— CAPABILITY PILLAR 01

Electronic Warfare

Protecting the Electromagnetic Battlespace

Our Electronic Warfare solutions enable detection, tracking, disruption and neutralization of emerging threats.

● ——— CORE CAPABILITY AREAS

Drone Systems

Radar Systems

Detection Systems

Jamming Systems

Electro Optic Camera

Communication System

Applications span defence installations, borders, strategic facilities and critical infrastructure.

● ——— ELECTRONIC WARFARE

Drone Systems

Countering Autonomous Threats

Designed to identify, track and counter modern unmanned threats.

● ——— PORTFOLIO

FPV Drone Buddy

FPV Bullseye &
Interceptor

Varuna Underwater
Drone

PROXY Control Channel

Heaven SDR
Surveillance Drone

● ——— ELECTRONIC WARFARE

Radar, Detection & Jamming Systems

Radar Systems

- 3D Drone Radar
- Surveillance Radar

Detection Systems

- RF Detector
- 3D Drone Detector
- Smart Soldier Band
- VSR to MRR

Jamming Systems

- Infinity Spear
- Infinity Rhino
- Infinity Rhino Black
- Rhino Gen Z23
- Butterfly ADG L70

● — CAPABILITY PILLAR 02

Information Warfare

Intelligence Creates Strategic Advantage

Modern military and security operations depend on information superiority.

Sahana Defence gathers, fuses and operationalizes intelligence to support faster decision-making and mission effectiveness.

● — DOMAINS

Intelligence & Surveillance

Command & Control

Communication & Monitoring

Intelligence & Surveillance

Detect Earlier. Decide Faster.

Open Source Intelligence (OSINT)

Harness publicly available information to produce actionable intelligence.

Signal Intelligence (SIGINT)

Collect and analyze signals across complex environments.

Comprehensive Security Assessment

Identify vulnerabilities, risks and operational opportunities.

● INFORMATION WARFARE

Command & Control

Connecting Intelligence to Action

FUSION Core AI Command & Control

Unified operational visibility across multiple information sources.

Interception Systems

Detection, tracking and response coordination against evolving threats.

Outcomes

● Faster decisions

● Better visibility

● Improved coordination

Communication & Monitoring

Control the Spectrum. Control the Situation.

Capabilities

- Radio Monitoring
- Radio Location Portfolio
- Direction Finders

Benefits

- Spectrum awareness
- Signal monitoring
- Enhanced operational security

● — CAPABILITY PILLAR 04

Aerospace & Defence Manufacturing

Precision That Powers Missions

Built upon a strong engineering and manufacturing legacy, Sahana Defence delivers mission-critical systems and components for aerospace, defence and strategic programs.

● — FOCUS AREAS

Aerospace Components

Defence Components

SATCOM Components

Advanced Manufacturing

● — AEROSPACE & DEFENCE MANUFACTURING

Aerospace Components

Mission-Critical Aerospace Engineering

Precision components powering ISRO's flagship missions, Chandrayaan, GSAT, IRNSS, Oceansat, and Cartosat. Trusted partner to ISRO's Space Applications Centre across mechanical, RF, and optical systems for GEO and LEO satellites.

Mechanical & Structural

RF & Microwave

Optical & Electro-Optics

Space Electronics

● — AEROSPACE & DEFENCE MANUFACTURING

Defence Components

Core Manufacturing Capabilities

Critical components for HAL's LCA and HTT-40 platforms, including bolts, IGV levers, flanges, nozzles, and turbine blades for the Engine Division. Built and inspected to the tight tolerances that extreme thermal and mechanical stress demand.

Defence Components

Aerostructure Components

Manufacturing Capability

● — AEROSPACE & DEFENCE MANUFACTURING

Satcom Components

Core Manufacturing Capabilities

RF, microwave, and structural components engineered for signal integrity and orbital reliability. Precision manufacturing that keeps satellite communication systems performing over the long term.

**Structural & Antenna
Systems**

**RF & Microwave
Systems**

Mission Accomplished

With Orbitt Space Solutions

01

Satellite Programmes

Manufactured precision components for the ORS-1, ORS-1A, ORS-2, and ORS-3 satellite series, contributing to payload and structural systems for communication satellites.

02

Launch Vehicle Programmes

Provided critical components for PS4, SSLV, and GSLV Mk III launch vehicle programmes, supporting India's independent access to space capabilities.

03

Critical Sub Systems

Specialised in manufacturing Reaction Wheels and Star Sensors, essential components for satellite attitude control and navigation systems.

Key achievements

- Long-term manufacturing partner since 2010
- Contributed to multiple successful satellite missions
- Supported India's launch vehicle indigenisation efforts
- Maintained zero-defect quality standards for space applications
- Built deep expertise in precision space components

Powering India's Air Superiority

Through Precision Manufacturing

40,000+
Engine components
delivered to HAL's SED
Koraput division.

Components supplied
in direct support of the
Sukhoi (Su-30MKI)
aircraft programme.

Manufactured to
defence-grade
tolerances using titanium
alloys, high-alloy steel,
and nickel alloys.

Performance
recognised through
appreciation letters
from HAL's Koraput
engine division.

Demonstrates
Siddhanta's end-to-end
capabilities in design,
multi-axis CNC
machining, and in-house
CMM inspection for
high-volume, mission-
critical production.

● ——— QUANTUM TECHNOLOGY SOLUTIONS

Quantum Sensing

Measuring What Classical Systems Miss

Quantum-grade sensing hardware, engineered from room temperature to cryogenic, giving defence and aerospace platforms a precision classical systems can't reach.

● ——— PORTFOLIO

01

**Wideband RF
Detectors**

02

**Quantum Microwave
Devices**

03

**Rydberg Atom
Quantum Sensors**

04

Quantum Drone

05

**Quantum Clock
Source**

● — QUANTUM TECHNOLOGY SOLUTIONS

Quantum Communication

Securing the Unbreakable

Secure, sovereign communication built on quantum principles, protecting India's most sensitive channels against both classical and quantum threats.

● — DOMAINS

**Quantum Secured
Communication**

Quantum Internet

**Hardware based Post
Quantum Cryptography**

Quantum Control Systems

● ——— CAPABILITY PILLAR 03

Defence Deeptech

The Digital Layer Behind Modern Defence

Artificial intelligence, data engineering and digital infrastructure are transforming modern security operations.

Sahana Defence develops technologies that enhance awareness, automation and mission execution.

Artificial Intelligence & Data

Transforming Data into Operational Advantage

Capabilities

- Artificial Intelligence
- Big Data & Analytics
- Business Intelligence
- Voice & Conversational Solutions

Impact

- Faster intelligence processing
- Improved situational awareness
- Enhanced decision-making

HERITAGE

Founder Legacy & Manufacturing Heritage

Engineering Excellence Since 2004

The origins of Sahana Defence are rooted in precision manufacturing and aerospace engineering.

MILESTONES

Embedded with ISRO from inception

Supported national aerospace programs

Aerospace-grade manufacturing expertise

Trusted supplier to strategic organizations

Legacy

A strong manufacturing foundation powering future defence innovation.

● — AEROSPACE & DEFENCE MANUFACTURING

Manufacturing Excellence

Precision. Reliability. Scale.

● — INFRASTRUCTURE

4-Axis Machining

5-Axis Machining

CNC EDM

CAD/CAM Engineering

**CMM Inspection
Systems**

**Advanced Quality
Laboratories**

Strengths

- —
- Aerospace-grade precision
- Rapid prototyping
- Complex geometry machining
- End-to-end manufacturing control

Trusted By Strategic Organizations

RESEARCH & INDUSTRY

SPACE & SATELLITE

DEFENCE & GOVERNMENT

● — THE SAHANA ADVANTAGE

Why Sahana Defence

Indigenous Innovation

Built for evolving national security needs design, develop and deploy.

Vertically Integrated Capability

Electronic Warfare, Information Warfare, Defence Deeptech and Aerospace Manufacturing under one organization.

End-to-End Delivery

From intelligence systems to deployed hardware.

Mission Focus

Protect. Detect. Dominate.

Leadership Team

Pratik Kakadia

Managing Director

- Serial entrepreneur
- Founder of multiple ventures
- Strategic business leader

Dhaval Joshi

Group CEO

- B.Tech, M.Tech, PhD
- Technology and AI leader
- Extensive enterprise-scale experience

**Brig. Rajiv Singh
(Retd.)**

Chief Strategy Officer

- 34 years in the Indian Army
- Corps of Signals veteran
- Defence modernization and strategic planning expert

Yogesh Pajni

**Director- Defence
Engineering Technical &
Production**

- Founder of Magma Machining
- Aerospace and precision engineering specialist
- Long-standing contributor to strategic manufacturing programs

Nikhil Mitaliya

**Director
Defence R&D**

- Founder of S-Qube
- Design Build and Operate Aerospace defence and Quantum systems
- Long-standing contributor to strategic manufacturing programs
